Logic Model Cheat-Sheet

"A logic model is a graphic depiction of the relationship between your program's activities and its intended effects."
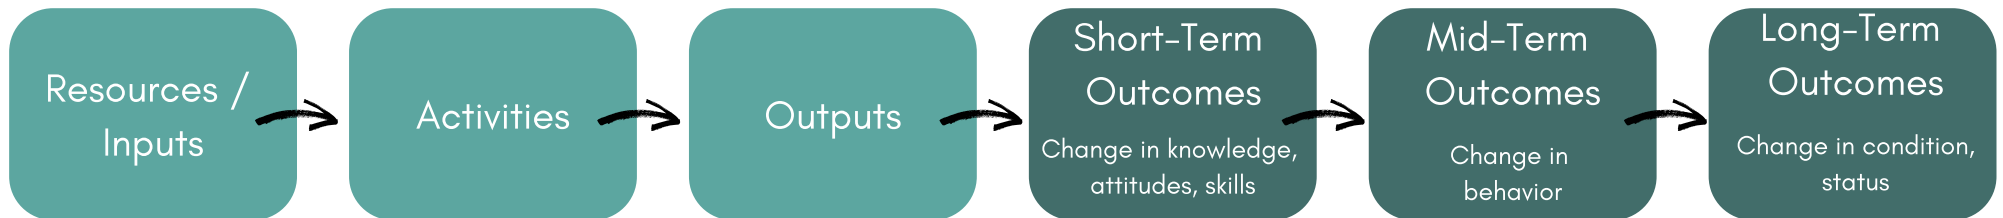

– Centers for Disease Control and Prevention, Learning to Love Your Logic Model (2017)

What do we **need**?

What do we **do**?

What do we **deliver**?

What **difference** do we make?

| Resources / Inputs | Activities | Outputs | Short-Term Outcomes

Change in knowledge, attitudes, skills | Mid-Term Outcomes

Change in behavior | Long-Term Outcomes

Change in condition, status |

If you want to run your program,

Then you need certain human and financial resources or inputs.

If you have those resources,

Then you can run your activities.

If you run those activities,

Then you will have delivered the services you planned.

If you delivered the services as planned,

Then your clients or communities will have changed in certain ways over a certain amount of time.

Inspired by a logic model resource from Useable Knowledge, LLC.

SharpInsight

Logic Model:

Mission: _____

RESOURCES / INPUTS	ACTIVITIES	OUTPUTS	OUTCOMES		
			SHORT-TERM	MID-TERM	LONG-TERM
